

## **The Vision of APS's Energy Conservation Program:**

*To ensure a partnership between "Schools & M&O" that pursues an outreach energy and environmental conservation program for school team members that will preserve natural resources and provide funds back to schools based on their energy savings.*

### **"Goals"**

- **P**rovide an outreach and educational energy conservation program to administrators, teachers, custodians, students and encourage family / community support.
- **P**rovide resources, which allow facility managers, the means to reduce energy consumption and thus improve environmental conservation.
- **P**rovide projects / programs designed to perpetuate the educational process that will create program sustainability.
- **P**rovide statistical information / programs designed to stimulate energy awareness and justify ongoing reward incentives directly related to energy conservation / efficiency within the district.
- **P**rovide a utility monitoring system and appreciation program reinforcing how lifestyle changes in their school and home can impact utility bills as well as preserving natural resources.
- **P**rovide a recognition program impacting all levels of involvement.
- **P**rovide open communication with all utility companies.
